

Instructions for Upper Endoscopy (Morning Appointment)

Date: _____ @ _____

1. **Nothing to eat or drink after midnight the night before the procedure.**
2. You may take **required medications @ 5:00 am** with a sip of water.
3. **Required medications** include anything for: blood pressure, heart, anxiety, depression or pain. Use your Inhaler Devices as directed.
4. On the day of the procedure, insulin or diabetes medication should not be taken until after the test is completed. Be sure to tell us if you are a diabetic so that you can be scheduled early in the day.

Check your Blood Sugar before you come in for your procedure and bring the results with you.

BLOOD THINNER MEDICATIONS:

You must be sure to **inform the doctor or nurse if you are on any blood thinners.** Blood thinners may have to be stopped in advance for conditions such as Dysphagia (trouble swallowing), Barrett's Esophagus, Schatzki's Ring or Esophageal Lesions.
